--------------	----------

r2readthedocs	<i>Convert package documentation to readthedocs format</i>
---------------	--

Description

Convert package documentation to readthedocs format

Usage

```
r2readthedocs(path = here::here(), dev = FALSE, open = TRUE)
```

Arguments

path	Path to local R package with documentation to be converted
dev	If TRUE, include function documentation of all dependency packages in site.
open	If TRUE, open the documentation site in default browser.

Value

TRUE (invisibly) if documentation successfully converted.

rtd_build	<i>Build the RTD site</i>
-----------	---------------------------

Description

Build the RTD site

Usage

```
rtd_build(path = ".", dev = FALSE)
```

Arguments

path	Path to local R package with documentation to be converted
dev	If TRUE, include function documentation of all dependency packages in site.

rtd_clean	<i>Clean the RTD _build directory</i>
-----------	---------------------------------------

Description

Clean the RTD _build directory

Usage

```
rtd_clean(path = ".", full = FALSE)
```

Arguments

path	Path to local R package with documentation to be converted
full	If TRUE, also clean R package files, including vignettes and help files. Use r2readthedocs to re-generate these.

rtd_dummy_pkg	<i>Make a dummy package for testing 'r2readthedocs' functions</i>
---------------	---

Description

Make a dummy package for testing 'r2readthedocs' functions

Usage

```
rtd_dummy_pkg(base_dir = tempdir(), pkg_name = "demo")
```

Arguments

base_dir	Base directory in which package is to be constructed (as a sub-directory)
pkg_name	Name of package, which will become a sub-directory of base_dir.

Value

Path to root directory of resultant package

rtd_open	<i>Open the main RTD 'html' page in default browser</i>
----------	---

Description

Open the main RTD 'html' page in default browser

Usage

```
rtd_open(path = ".")
```

Arguments

path	Path to local R package with documentation to be converted
------	--
